User Acceptance Testing (UAT) Template

Date	4 December 2025
Team ID	
Project Name	FreelanceX -Freelance Finder
Maximum Marks	

Project Overview:

Project Name: FreelanceX- Freelance Finder

Description: Freelance Finder is an online platform designed to connect clients with skilled freelancers. The system supports smooth project collaboration through features such as profile setup, job creation, proposal submissions, real-time messaging, project tracking, and secure payment processing.

Project Version:v1.0.0

Testing Period: 24 November 2025 to 16 December 2025

Testing Scope:

The UAT process will validate the core functionalities of the platform, including:

- Account creation and authentication for new and existing users
- Profile setup for freelancers and clients
- Job listing creation, editing, and publishing
- Submitting and managing job proposals
- Real-time chat between freelancers and clients
- Secure payment processing and invoice generation
- Status tracking for job progress (applied, shortlisted, ongoing, completed)
- Search and filtering of jobs based on skills, category, and budget
- Ratings and feedback submission after project completion

Requirements to be Tested:

- Freelancers must be able to browse jobs and submit proposals easily.

- Clients must have the ability to create job posts and hire suitable freelancers.

- Users should experience secure authentication and payment transactions.

● Administrators should have tools to monitor user activity, review reports, and handle disputes.

Testing Environment:

Testing Environment

● **URL**: https://freelancefinder.example.com

● **Credentials**:

  ○ **Freelancer:** test.freelancer@example.com / password123

  ○ **Client:** test.client@example.com / password123

  ○ **Admin:** admin@example.com / adminpass

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	User Registration	Open the website Select "Create Account" Enter all required details and submit	A new account is created and the user is redirected to their dashboard		

TC-002	Post a Job (Client)	Log in as a client Navigate to "Create Job" Fill out the job details and submit	The job is published and visible in the job listings		

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Validation issue on job form	1. Log in as client 2. Submit empty form	Medium	Open	Form should show validation

Notes:

- Ensure test cases cover valid, invalid, and edge-case scenarios.

- Collect detailed tester feedback for UI, performance, and usability improvements.

- Final deployment should only proceed after approval from the product owner and project manager.
